## Prompt 1

### User request:

Hello there, I need your help to write the "received items" section of a forensic report.

"Two phones were taken from the suspects: (1) a Samsung Galaxy S6 Edge from Mr Pressive, and (2) an iPhone 6 from Mr Sforza. The phones were sent to the ESC for examination. / Transmitted items: The ESC received the items on 25 February. The case ESC-32-33-12 was created. The items were labelled as follows: > Samsung Galaxy S6 Edge (ESC-32-33-12\_P001) > iPhone 6 (ESC-32-33-12\_P002) A logical extraction of the Samsung (item P001) was performed on 25 February (ESC-32-33-12\_P001\_R001). Because no operable data was obtained with this technique, the phone was rooted on 26 February and a physical extraction was performed (ESC-32-33-12\_P001\_R002). A logical extraction of the iPhone (item P002) was performed on 1 March (ESC-32-33-12\_P002\_R001). After rooting the phone, a file system extraction was also performed on 5 April (ESC-32-33-12-P002\_R002). Some messages from the Telegram application were also captured using the screen recording function of the phone (ESC-32-33-12\_P002\_R003). For examination purposes, a mugshot of Tim Pressive is provided to the experts. For unknown reasons, the mugshot of Francesco Sforza was corrupted, and the mandating services do not currently possess an image of Mr Sforza. Due to Mr. Sforza having been extradited to Iraq in March of 2020, a demand for international legal assistance had to be brought to the Iraqi Department of Justice and is currently under review."

Please, summarize the previous text and describe the elements received for analysis.

### LLM answer:

In the "received items" section of the forensic report, the following items were received for analysis:

Samsung Galaxy S6 Edge (ESC-32-33-12\_P001): This phone was taken from Mr. Pressive.

A logical extraction was attempted on 25 February (ESC-32-33-12\_P001\_R001).

Due to unsuccessful data retrieval, the phone was rooted on 26 February, and a physical extraction was performed (ESC-32-33-12\_P001\_R002).

iPhone 6 (ESC-32-33-12\_P002): This phone was taken from Mr. Sforza.

A logical extraction was performed on 1 March (ESC-32-33-12\_P002\_R001).

After rooting the phone, a file system extraction was conducted on 5 April (ESC-32-33-12\_P002\_R002).

Some messages from the Telegram application were captured using the screen recording function of the phone (ESC-32-33-12\_P002\_R003).

Additionally:

The items were received on 25 February, and a case (ESC-32-33-12) was created for them.

The items were labeled as Samsung Galaxy S6 Edge (ESC-32-33-12\_P001) and iPhone 6 (ESC-32-33-12\_P002).

A mugshot of Tim Pressive was provided for examination.  
The mugshot of Francesco Sforza was found to be corrupted, and there is no current image of Mr. Sforza available.  
Mr. Sforza was extradited to Iraq in March 2020, and a request for international legal assistance is pending with the Iraqi Department of Justice.

## Prompt 2

### User request:

Hello there, I need your help to write the "received items" section of a forensic report.

"Two phones were taken from the suspects: (1) a Samsung Galaxy S6 Edge from Mr Pressive, and (2) an iPhone 6 from Mr Sforza. The phones were sent to the ESC for examination.  
Transmitted items: The ESC received the items on 25 February. The case ESC-32-33-12 was created. The items were labelled as follows: > Samsung Galaxy S6 Edge (ESC-32-33-12\_P001) > iPhone 6 (ESC-32-33-12\_P002) A logical extraction of the Samsung (item P001) was performed on 25 February (ESC-32- 33-12\_P001\_R001). Because no operable data was obtained with this technique, the phone was rooted on 26 February and a physical extraction was performed (ESC-32-33- 12\_P001\_R002). A logical extraction of the iPhone (item P002) was performed on 1 March (ESC-32-33- 12\_P002\_R001). After rooting the phone, a file system extraction was also performed on 5 April (ESC-32-33-12-P002\_R002). Some messages from the Telegram application were also captured using the screen recording function of the phone (ESC-32-33-12\_P002\_R003). For examination purposes, a mugshot of Tim Pressive is provided to the experts. For unknown reasons, the mugshot of Francesco Sforza was corrupted, and the mandating services do not currently possess an image of Mr Sforza. Due to Mr. Sforza having been extradited to Iraq in March of 2020, a demand for international legal assistance had to be brought to the Iraqi Department of Justice and is currently under review."

Please, summarize the previous text and describe the elements received for analysis.

### LLM answer:

In the forensic report, two phones were seized from the suspects, Mr. Pressive and Mr. Sforza, and subsequently sent to the ESC (Evidence and Security Center) for examination. The phones received were:

A Samsung Galaxy S6 Edge belonging to Mr. Pressive, labeled as "ESC-32-33-12\_P001."

An iPhone 6 owned by Mr. Sforza, labeled as "ESC-32-33-12\_P002."

The ESC received these items on 25 February, creating a case with reference number ESC-32-33-12. The examination process involved the following steps:

For the Samsung Galaxy S6 Edge (item P001):

A logical extraction was attempted on 25 February (ESC-32-33-12\_P001\_R001), but no operable data was obtained.

Consequently, on 26 February, the phone was rooted, and a physical extraction was performed (ESC-32-33-12\_P001\_R002).

For the iPhone 6 (item P002):

A logical extraction was performed on 1 March (ESC-32-33-12\_P002\_R001). Subsequently, after rooting the phone, a file system extraction was carried out on 5 April (ESC-32-33-12\_P002\_R002). Some messages from the Telegram application were also captured using the screen recording function of the phone (ESC-32-33-12\_P002\_R003). In addition to the phone data, a mugshot of Tim Pressive was provided to assist the experts with their examination. However, it was noted that the mugshot of Francesco Sforza had become corrupted. Due to Mr. Sforza's extradition to Iraq in March of 2020, a request for international legal assistance was made to the Iraqi Department of Justice, which is currently under review. This is likely due to the unavailability of an image of Mr. Sforza, which is required for the examination.

### Prompt 3

#### User request:

Hello there, I need your help to write the "received items" section of a forensic report.

"Two phones were taken from the suspects: (1) a Samsung Galaxy S6 Edge from Mr Pressive, and (2) an iPhone 6 from Mr Sforza. The phones were sent to the ESC for examination. Transmitted items: The ESC received the items on 25 February. The case ESC-32-33-12 was created. The items were labelled as follows: > Samsung Galaxy S6 Edge (ESC-32-33-12\_P001) > iPhone 6 (ESC-32-33-12\_P002) A logical extraction of the Samsung (item P001) was performed on 25 February (ESC-32-33-12\_P001\_R001). Because no operable data was obtained with this technique, the phone was rooted on 26 February and a physical extraction was performed (ESC-32-33-12\_P001\_R002). Due to Mr. Sforza having been extradited to Iraq in March of 2020, a demand for international legal assistance had to be brought to the Iraqi Department of Justice and is currently under review."

Please, summarize the previous text and describe the elements received for analysis.

#### LLM answer:

In the forensic report, the following items were received and analyzed:

Suspects' Phones: Two phones were confiscated from the suspects:

- (1) A Samsung Galaxy S6 Edge from Mr. Pressive.
- (2) An iPhone 6 from Mr. Sforza.

Date of Receipt: The phones were received by the ESC (Evidence and Examination Service) on 25th February. A case, labeled as ESC-32-33-12, was created for these items.

Labeling of Items: The received items were labeled as follows:

Samsung Galaxy S6 Edge: ESC-32-33-12\_P001

iPhone 6: ESC-32-33-12\_P002

Examination Process:

A logical extraction of the Samsung Galaxy S6 Edge (P001) was conducted on 25th February (ESC-32-33-12\_P001\_R001). However, this method did not yield any operable data.

Subsequently, on 26th February, the Samsung phone was rooted, and a physical extraction was performed (ESC-32-33-12\_P001\_R002).

A logical extraction of the iPhone (P002) was carried out on 1st March (ESC-32-33-12\_P002\_R001).

After rooting the iPhone, a file system extraction was also performed on 5th April (ESC-32-33-12\_P002\_R002).

Additionally, some messages from the Telegram application on the iPhone were captured using the screen recording function (ESC-32-33-12\_P002\_R003).

Mugshots:

A mugshot of Tim Pressive was provided to the experts for examination purposes.

Unfortunately, the mugshot of Francesco Sforza was found to be corrupted, and no other image of Mr. Sforza was available.

Extradition:

Mr. Sforza was extradited to Iraq in March of 2020.

A request for international legal assistance had to be submitted to the Iraqi Department of Justice due to Mr. Sforza's extradition, and this request is currently under review.

In summary, the ESC received two phones from the suspects, performed various extraction methods on them, and captured messages from one of the phones. Additionally, a mugshot of one suspect was provided for examination, while efforts to obtain a suitable image of the other suspect are ongoing, given his extradition to Iraq.

#### Prompt 4

User request:

Hello there, I need your help to write the "received items" section of a forensic report.

"Two phones were taken from the suspects: (1) a Samsung Galaxy S6 Edge from Mr Pressive, and (2) an iPhone 6 from Mr Sforza. The phones were sent to the ESC for examination.

Transmitted items: The ESC received the items on 25 February. The case ESC-32-33-12 was created. The items were labelled as follows: > Samsung Galaxy S6 Edge (ESC-32-33-12\_P001) > iPhone 6 (ESC-32-33-12\_P002) A logical extraction of the Samsung (item P001) was performed on 25 February (ESC-32-33-12\_P001\_R001). Because no operable data was obtained with this technique, the phone was rooted on 26 February and a physical extraction was performed (ESC-32-33-12\_P001\_R002). Due to Mr. Sforza having been extradited to Iraq in March of 2020, a demand for international legal assistance had to be brought to the Iraqi Department of Justice and is currently under review."

Please, summarize the previous text and describe the elements received for analysis.

LLM answer:

Summary:

In the forensic investigation, two phones were seized from the suspects, namely a Samsung Galaxy S6 Edge from Mr. Pressive and an iPhone 6 from Mr. Sforza. These devices were sent to the ESC (Evidence and Security Center) for examination. Upon receipt of the items on 25 February, a case (ESC-32-33-12) was created, and the items were labeled accordingly. Initial logical extractions of both phones were attempted, with the Samsung Galaxy S6 Edge requiring a subsequent physical extraction due to unsuccessful results. The iPhone 6 also underwent a logical extraction and, after rooting, a file system extraction was performed. Additionally, some messages from the Telegram application on the iPhone were captured using the screen recording function. A mugshot of Tim Pressive was provided for examination, but the image of Francesco Sforza was corrupted. Due to Mr. Sforza's extradition to Iraq in March 2020, a request for international legal assistance was initiated and is currently pending review by the Iraqi Department of Justice.

Elements Received for Analysis:

Samsung Galaxy S6 Edge (Item P001)

Logical extraction (25 February) - ESC-32-33-12\_P001\_R001

Physical extraction (26 February) - ESC-32-33-12\_P001\_R002

iPhone 6 (Item P002)

Logical extraction (1 March) - ESC-32-33-12\_P002\_R001

File system extraction (5 April) - ESC-32-33-12\_P002\_R002

Captured messages from Telegram (Screen recording) - ESC-32-33-12\_P002\_R003

Mugshot of Tim Pressive provided for examination.

Mugshot of Francesco Sforza, which was corrupted and unavailable for examination.

Ongoing request for international legal assistance to obtain information or images related to Mr. Sforza's extradition to Iraq in March 2020, currently under review by the Iraqi Department of Justice.
