

# ReceivedItems\_Llama

## Prompt 1

### User request:

Hello there, I need your help to write the "received items" section of a forensic report.

"Two phones were taken from the suspects: (1) a Samsung Galaxy S6 Edge from Mr Pressive, and (2) an iPhone 6 from Mr Sforza. The phones were sent to the ESC for examination. Transmitted items: The ESC received the items on 25 February. The case ESC-32-33-12 was created. The items were labelled as follows: > Samsung Galaxy S6 Edge (ESC-32-33-12\_P001) > iPhone 6 (ESC-32-33-12\_P002) A logical extraction of the Samsung (item P001) was performed on 25 February (ESC-32-33-12\_P001\_R001). Because no operable data was obtained with this technique, the phone was rooted on 26 February and a physical extraction was performed (ESC-32-33-12\_P001\_R002). A logical extraction of the iPhone (item P002) was performed on 1 March (ESC-32-33-12\_P002\_R001). After rooting the phone, a file system extraction was also performed on 5 April (ESC-32-33-12-P002\_R002). Some messages from the Telegram application were also captured using the screen recording function of the phone (ESC-32-33-12\_P002\_R003). For examination purposes, a mugshot of Tim Pressive is provided to the experts. For unknown reasons, the mugshot of Francesco Sforza was corrupted, and the mandating services do not currently possess an image of Mr Sforza. Due to Mr. Sforza having been extradited to Iraq in March of 2020, a demand for international legal assistance had to be brought to the Iraqi Department of Justice and is currently under review."

Please, summarize the previous text and describe the elements received for analysis.

### LLM answer:

The two phones were sent to the ESC on 25 February. The items labeled as follows:  
-Samsung Galaxy S6 Edge(ESC-3-3-2-12-P01)  
-iPhone 6(ESC-3-3-2-12-P02)  
Logical Extraction of the Samsung (item P01) was carried out on 25 Feb, the phone was rooted on 26 Feb. A physical extraction was then made  
A logical extraction of the iPhone (item P02) was performed on 1 March. Some messages from telegram app were captured with screen recording.  
For examination purposes, mugshots of Tim Pressive are provided to the experts. No such mugshot of Francesco Sforza was available so the department of justice will be asked for an image.

"Two phones were taken from the suspects: (1) a Samsung Galaxy S6 Edge from Mr Pressive, and (2) an iPhone 6 from Mr Sforza. The phones were sent to the ESC for examination. / Transmitted

items: The ESC received the items on 25 February. The case ESC-32-33-12 was created. The items were labelled as follows: > Samsung Galaxy S6 Edge (ESC-32-33-12\_P001) > iPhone 6 (ESC-32-33-12\_P002) A logical extraction of the Samsung (item P001) was performed on 25 February (ESC-32-33-12\_P001\_R001). Because no operable data was obtained with this technique, the phone was rooted on 26 February and a physical extraction was performed (ESC-32-33-12\_P001\_R002). A logical extraction of the iPhone (item P002) was performed on 1 March (ESC-32-33-12\_P002\_R001). After rooting the phone, a file system extraction was also performed on 5 April (ESC-32-33-12-P002\_R002). Some messages from the Telegram application were also captured using the screen recording function of the phone (ESC-32-33-12\_P002\_R003). For examination purposes, a mugshot of Tim Pressive is provided to the experts. For unknown reasons, the mugshot of Francesco Sforza was corrupted, and the mandating services do not currently possess an image of Mr Sforza. Due to Mr. Sforza having been extradited to Iraq in March of 2020, a demand for international legal assistance had to be brought to the Iraqi Department of Justice and is currently under review."

Please, summarize the previous text and describe the elements received for analysis.

LLM answer:

The suspects' phones were sent to the ESC for examination on 25 February, and two cases were created for them. The first case ("ESC-32-3-12\_P01") corresponds to the Samsung Galaxy S6 Edge from Mr Pressive, and the second one ("ESC-3-2-3-12\_P02") corresponds to the iPhone 6 from Mr Sforza. On 26 February, a logical extraction was done on the Samsung phone (ESC-3-2-3-12-P01\_R01), which yielded no operable data. Therefore, rooting was performed on 26 February (ESC-3-2-3-12\_P01\_R02) and a physical extraction on 5 April (ESC-3-2-3-12\_P01\_R02). A mugshot of Tim Pressive was provided to experts and a screen recording of Francesco Sforza was also captured for examination purposes. Mr Sforza was extradited to Iraq on 20 March and so the mandating service filed an international request to Iraq's Department of Justice which is now under review.

Prompt 3

March of 2020, a demand for international legal assistance had to be brought to the Iraqi Department of Justice and is currently under review."

Please, summarize the previous text and describe the elements received for analysis.

LLM answer:

The text above contains information regarding the items received by the ESC. In particular, it mentions that two phones were taken into evidence: one being a Samsung Galaxy S6 Edge from Mr Pressive and the other being an iPhone 6 from Mr Sforza. The cases are labelled ESC-32-3-12\_P01 and ESC-32-3-12\_P02, respectively. On 25 February, the logical extraction of P01 was completed (ESC-32-3-12\_P01\_R01) but no operable data was obtained. P02 was rooted on 26 February and a physical extraction was then performed (ESC-32-3-12\_P02\_R02). On 1 March, a logical extraction of P02 was performed (ESC-32-3-12\_P02\_R01), and some messages from Telegram were captured using the screen recording function (ESC-32-3-12\_P02\_R03). A mugshot of Tim Pressive is provided and a demand for international assistance has been sent to the Iraqi Department of Justice because Mr. Sforza has been extradited there in march 202020.

LLM answer:

"The devices ESC-32-3-12\_P01 and ESC-3-2-3-12\_P02 have been sent to the ESC for examination. It appears that Samsung's Galaxy S6 Edge is a Samsung Galaxy S6 Edge and the iPhone 6 is an Apple iPhone 6. The logical extractions yielded no results. Both phones were rooted and physical

extractions were made as well. A mugshots of both suspects are available. TimPressive was in possession of the Samsung device, while the iPhone was found on Francesco Sforza."
